

# A-KABEL **2talk**

Safe, reliable, hands free, full-duplex wireless communications between two people up to 200 metres apart.

Wireless, full-duplex communications between two users in a variety of demanding environments. The flexibility of the 2talk range allows it to be used in many different environments, from high noise to hazardous areas. Users can now communicate totally hands-free in a conference without having to stop work or push any buttons.

- > **Wireless communications**
- > **Full-duplex conference call**
- > **Handsfree mobility**
- > **Modular headset flexibility**
- > **High noise and lightweight versions**
- > **No licence required**

Communicating between two tree surgeons can be difficult. Noise and poor communications can compromise safety and reduce productivity. With **2talk Arborcom** you will greatly increase the operators safety and productivity through improved, reliable communications.

No need for any hand signals, shouting and having to stop work! No buttons to push and

hold in when talking, simply turn the headsets on and carry on working. The full-duplex feature allows both operators to talk to each other at the same time. This greatly increases safety. The noise cancelling microphone filters out the background noise, allowing speech to be heard clearly and concisely. The excellent passive attenuation ensures your hearing is protected at all times.

- Full-duplex hands-free wireless communications between operators allows continuous communications and total freedom to move
- No licence required, simply switch on and go and work
- Headsets work in pairs up to 200 metres apart (depending on environment)
- Full encryption ensures total security between users
- All metal parts are stainless steel to increase durability
- Quick positioning noise cancelling boom microphone filters out background noise for clear speech transmission
- 2 x re-chargeable AA batteries and charger are supplied with the headsets
- Fits to BALANCE AC and PETZL helmets (and others)
- Excellent passive attenuation ensures excellent hearing protection
- CE, EMC and FCC approved
- Designed and manufactured in Norway

Operators can talk together with total freedom to maintain personal safety

**Part nos & Colours:**

**AK6591-ACPZ** Helmet Attach Yellow (standard)

**AK6592** Headband Yellow (standard)

**AK6591-ACPZ-BLACK** Helmet Attach (to order only)

**AK6592-BLACK** Headband (to order only)

**AK6591** & **AK6592** are manufactured in accordance with the harmonised standards EN 352-3:2002 & EN352-1:2002 to Directive 89/686/EEC.

The headsets are tested in accordance EN 352-3:2002 & EN352-1:2002

FCC ID: U2A-AK6591AK6592

**2talk High-Noise** headsets work in pairs up to 200 metres apart totally hands-free. The full-duplex feature enables both users to talk together in a conference. No need to push a button or wait your turn to talk. Instant, clear communications all the time, even in noisy environments, ensures safety is not compromised. Simple and easy to use, just switch them on then get going, with both hands free to carry out your work more efficiently. Headband and hard hat versions are available to suit most applications.

- Full-duplex conference call between both users
- Up to 200 metre range (depending on environment)
- Encryption between pairs means no cross talk between working pairs in the same area
- Total hands free for greater freedom
- Headsets can be paired to mobile phones (not at the same time as the conference)
- Rugged durable build quality
- Powered by 2 AA batteries (re-chargeable can be used)
- No need to re-pair headsets when turned on/off or when batteries are changed
- No need to push buttons to talk
- Headband and helmet attachment versions available
- Noise-cancelling boom microphone ensures clear speech even in high noise
- Available in Hi-Viz Yellow (standard) or Black (special order)

together in a conference  
move, greatly improving  
and productivity.

**Part nos & Colours:**

- AK6591** Helmet Attach Hi-Viz Yellow (standard)
- AK6592** Headband Hi-Viz Yellow (standard)
- AK6591-BLACK** Helmet Attach (to order only)
- AK6592-BLACK** Headband (to order only)

**AK6591** & **AK6592** are manufactured in accordance with the harmonised standards EN 352-3:2002 & EN352-1:2002 to Directive 89/686/EEC. The headsets are tested in accordance EN 352-3:2002 & EN352-1:2002

## Modular

**2talk Modular** handsets allow both users to talk in conference without having to push any buttons or wait their turn to talk. The modular design allows various different headsets to be used to suit the environment you are in. Lightweight or ear defender headsets, throat microphones with different earpieces ensure great flexibility for the users. The full-duplex feature allows both users to talk at the same time to ensure any emergency commands can be heard instantly and as a result, safety is not compromised. The instant communications reduces downtime which helps improve productivity and profitability.

- **2talk Modular** handsets work in pairs with a variety of headsets
- Encrypted full-duplex communication between handsets/headsets
- Can be fitted with re-chargeable batteries which can be charged without having to remove from the handset with approx 20 hours user time (4 hours charge time)
- Can also be powered by 2 x AA batteries
- **2talk Modular** handsets can be paired with 2talk High Noise/Arborcom
- Pairs of handsets will not interfere with other handsets/headsets working in the same area
- Total hands-free communication allows full mobility for the user
- Flexible modular headset range allows use even when wearing fireman's or other protective helmets
- Can be used with throat microphone allowing use whilst wearing Breathing Apparatus & Masks
- Rugged, durable design
