

**AK 5850-100**

## **Passive Headset for Ground Mechanic and Two-Way radios.**

*CC Passive Noise cancelling headsets for connecting directly to the Aircraft and are also compatible with numerous Motorola, Kenwood and ICOM hand portable two-way radios (with PTT2000 adaptor). A-KABEL Ground Crew Headsets allow you to use one headset for two separate and very important functions, helping to improve communication, operator versatility and safety.*

- Noise cancelling boom microphone gives a high perception of speech, by filtering out background noise
- Easy positioning fully flexible and robust boom microphone.
- All components can be easily replaced for ease of maintenance
- Headset is compatible with numerous PMR belt radios by connecting to an in-line PTT2000 or PTT7000
- Padded headband with adjustable pressure control and soft ear cushions give high comfort
- All metal parts are stainless steel for increased durability
- The headsets are manufactured in modules so every component can be easily replaced
- All internal electrical components and cables have clip connectors, so are easy to replace
- All cables are manufactured for long life. The coiled leads are tested for 1,000,000 flexions
- External cables and connectors have moulded waterproof strain reliefs
- Spares parts are available from stock for reduced downtime

Extension leads available with PTT 2000 or PTT7000
