

*2 into 1 will go!*

*2 Radios.....1 Headset!*

- Connection to two radios together allowing communication on two different channels at the same time
- Both radios use one common noise cancelling microphone
- Audio speakers work independently, so you can receive transmission from both radios at the same time
- Independent PTT's allows for individual or dual transmission
- Available for numerous different radios
- Lightweight yet robust to maximise comfort, ensuring maximum protection against harmful noise
- Can be customised to suit your individual requirements
- Detachable flexi-boom microphone
- Headband and helmet attached versions

*No noise.....No problem!*

W3000 Lightweight headsets offer an excellent alternative when high ambient noise is not a problem.

•Lightweight headset with neckband ensures headset stays on your head even when running

•Connection to two radios together allowing communication on two different channels at the same time

•Speakers work independently, so you can receive transmission from both radios at the same time

•Independent PTT's allows for individual or dual transmission

•Fits discreetly under helmets or head clothing

•Heavy duty leads and connectors for increased durability

•Versions available for numerous different radios
