

THBH9000 Heavy Duty Neckband Headsets

Noise cancelling headsets for connecting directly to most hand portable two-way radios. Neckband enabled headsets to be worn with or without safety helmets. Headsets enhance the radios communication giving safer and more efficient two-way communications even when in noisy environments. Available in a broad range of different configurations.

Available for numerous different two-way radios Motorola, ICOM, Kenwood, Simoco, Yaesu, Walter Dittel and more! Fitted with heavy duty straight or coiled leads for good durability.

- Noise cancelling boom microphone gives a high perception of sound even in noisy environments
- Neckband allows headsets to be used with or without safety helmets
- Electret or Dynamic microphone elements can be changed without removing the complete boom
- Numerous different connectors to suit most radios on the market
- VOX (voice activated) versions available
- Adjustable Velcro headband support increases user comfort
- Rugged build quality for increased durability

- Good ambient noise attenuation allows clear, concise communication even in noisy environments
- Various Press-to-Talk (PTT) switch options for ease of operation

Choice of Cup mounted hard-wired in-line or detachable in-line PTT switches.
