

SWATCOM™

Slim Electronic

Electronic Hearing Protection

A general purpose ultra-slim active hearing protector for use in hunting, shooting, leisure and industrial environments.

The ultra-slim line cup is made from ABS plastic and incorporates an easily accessible compartment for the 1.5 volt battery. The independent level-controlled amplifiers in each cup provide enhanced hearing at low sound levels, yet provide substantial protection from both impulse and constant noise levels. The PVC covered foam filled cushions ensure a comfortable fit and an effective sound seal around the ear.

Amateur, Profesional, Industrial or Leisure.

The SWATCOM Slim Electronic was not only designed to give users protection but to also enhance their performance. The headset features advanced circuitry enabling the user to hear normally, with a small level of amplification when subjected to impulse noise such as a gunshot. The ultra slim design and light weight makes the headset extremely durable and practical for everyday use.

Features:

- Durable
- Reliable
- Practical
- Ultra-slim
- Easily operated
- 300hrs battery life
- Pocket size when folded
- Stainless steel headband
- Adjustable stereo sound
- 23dB SNR protection level

Weight of hearing protector: 249gms (Excluding batteries)

Manufactured in the United Kingdom 

SWATCOM™

Slim Electronic Electronic Hearing Protection

One of the slimmest hearing protectors available.

- Available in black or green
- Provided protection without the loss of hearing
- Low cost external fitting batteries with 300 hours life
- Noise Compression circuit does not turn off but limits sound to 80dB.

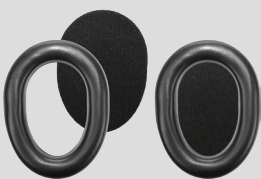

Attenuation

A gunshot is an impulse noise which is particularly harmful to the human ear. A single shot can cause permanent damage. The SWATCOM Slim Electronic compression circuit limits the noise of a gunshot to 80dB for reassured protection.

Comfort

Many shooters have to wear their hearing protectors for a long time. The fasteners allow an even distribution of pressure over the headband and cups which ensure the ear muff stays in place even during sudden head movements. The ultra slim cups minimise contact with the butt of the gun and allow the headset to fit under a hat or ballistic helmet.

HYGIENE KIT

- < Easy to replace
- < Fits with a good seal around ears
- < Soft cushion increases comfort
- < Product Code: DS 4113

HEADSET BAG

- > 215 gms
- > H:26 L:21 W:12
- > Extra protection
- > Headset fits with room to spare
- > Product code: SC-BAG005
