

SWATCOM SC33

Cameraman Headset for High Noise Environments

The SWATCOM SC33 Cameraman Headset has been designed to enable the user easier accessibility to the cameras functions and controls.

The SLIM right hand cup minimizes the bulk of the traditional high noise headset but still maintains a good level of noise protection and audio quality.

The high attenuating left hand cup ensures all communications remain audible even in high noise.

The Dynamic boom microphone ensures clearly transmitted communication and comparability with traditional broadcasting systems.

Product Code: SC33-5850H-07-XLR*
